

dekodur. DISTIL

STYLE & SUBSTANCE ARE ONE IN FLUX

Dekodur, a leading German brand took the world by storm when it introduced the world's first decorative laminates with real metal surfaces in the 1950s.

Dekodur Distil is an exclusively curated brand of premium and distinctive Dekodur metal laminates designed especially for the most discerning of clientele. FLUX, the innovative portfolio, headlines the brand with its compelling collection of laminates influenced by the tagline: Metals Make Magic.

The Magnetic series is amazingly versatile as it allows efficient exchange of information and

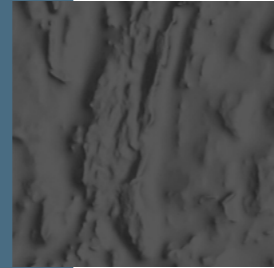

encourages creativity. Aficionados of artistry will be captivated by the Structures series with its variety of eye-catching designs and subtle tactility while the Brushed and Mill series, with their delicately radiant surfaces, are exquisitely elegant. The mirror-like Reflective series is the epitome of style and luxury.

Classy aesthetics complemented by essential functionality are the essence of Dekodur Distil. Be amazed by exceptional metal laminates, with style and substance, for any interior space.

MAGNIFICENTLY ENERGETIC

Enthralling Metal Laminates That Evoke Vitality & Strength

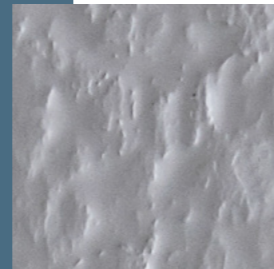

Inspired by molten lava, which moves with such compelling intensity, such fervent vigour, the Lava range has been crafted to illustrate its innate potency. Inspired by this awe-inspiring force of nature, the surface of this Structures' range needs to be admired up close, and it's glorious to touch too.

CARE GUIDES

General Cleaning Tips

We recommend using warm, soapy water or mild household detergent and a soft cloth for cleaning.

For Reflective laminates, we highly recommend using a soft, lint-free cloth.

Avoid using abrasive liquid cleaners, bleaching compounds or solvent-based solutions as these will damage the laminate surface.

Magnetic Laminates

For our Matt laminates, we recommend using chalkboard markers for best writing performance. Hence, for cleaning, melamine sponges offer the best results.

If there are stubborn stains, use a damp melamine sponge.

For detailed care instructions, visit our website.

DEKO FIRESAFE*

The deko FireSafe solution is offered for many of the FLUX laminate designs. Essentially, a decorative HPL with deko FireSafe is classified, certified and patented as non-flammable. When used in conjunction with non-combustible carrier boards, the resultant composite panels feature building Class A or 1 fire protection rating. The deko FireSafe

solution is highly recommended for the cladding of escape and rescue routes, stairways, electronic ducts, inspection shafts and other key areas in public facilities such as schools, kindergartens, hospitals and shopping malls.

(DIN EN 13501-1, A2-s1-d0, Patent No. 10 2014 116 984)

ECO-HPL*

The environment is important to us and ECO-HPL is the world's first CO2 neutral laminate, free from formaldehyde and phenol. The core of every laminate sheet is manufactured from 100% biological secondary components which are obtained from renewable resources and is fully recyclable. Analysed and certified by

the development and test laboratory for wood technology at Dresden, Germany, these laminates have a formaldehyde emission of < 0,002ppm acc (DIN EN 16516 1-2018). Many of the FLUX laminate designs can be produced as ECO-HPL.

MAGNETIC

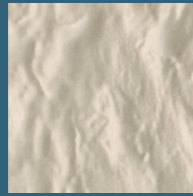

A magnetic surface affords a variety of uses and applications. To achieve the optimum performance of the magnetic feature, a laminate sheet is embedded with a special metal core. When used with good quality magnets, the strength of attraction is high.

The innovative magnetic feature can be added to many of the FLUX laminate designs through the use of the Raw Magnetic laminate.

*Laminates with the above-mentioned features can be ordered on an indent basis. Do note that additional costs apply to DEKO FIRESAFE and ECO-HPL.
